

BOOK 0 — INTERPRETIVE CONTROL PLANE

Document ID: PH6-BOOK0-CONSOLIDATED-1.0

Role: CANON

Status: ACTIVE

Question Answered: How doctrine is interpreted.

B0 § 0 — System Identity Statement

PH6 / CRAM is a **deterministic scientific evidence instrument** for physical surveillance, sensor capture, replay, audit, and export. It is not a general-purpose AI surveillance stack.

B0 § 1 — Interpretive Precedence

- 1. Newest explicit instruction
- 2. Clearest technical source
- 3. Safest default

B0 § 2 — Controlled Vocabulary Lock

Term	Meaning	Forbidden Use
Engine	Explanatory partition only	Never autonomous authority
Lane	Authority boundary	Never explanatory metaphor
Layer	Implementation decomposition	Never authority source
Mode	Use "Framing" or "Posture" instead	Avoid authority implications
Scientifical	DEPRECATED	Replace with "Scientific Instrument Framing"

B0 § 3 — Reader Protocol / Mandatory Reading Order

- 1. Book 0 — Interpretive Control Plane

2. Book I — Operational Source Constitution
3. Book II — Scientific Instrument Master
4. Book III — Boundary Containment Annex
5. Book IV — Certification Proof Pack
6. Book V — Experimental Swarm Annex (Optional)

B0 § 4 — Inference Firewall

- Interpretation may not alter doctrine.
- Advisory material may not be merged into doctrine.
- Do not infer authority from metaphor.
- Do not promote implementation into law.

B0 § 5 — Drift Prohibition

- Implementation may refine constraints.
- Implementation may NOT relax constraints.
- Any deviation breaks deterministic serialization and invalidates hash stability.

B0 § 6 — Scientific Mode vs Authority Mode Separation

- Lane 1: Authoritative Instrument Science (Capture, Preserve, Measure, Adjudicate).
- Lane 2: Exploratory Scientific Analysis (Hypothesis, Experiment, Advisory AI).
- **One-Way Membrane:** Lane 1 → Lane 2 (Allowed); Lane 2 → Lane 1 (Forbidden).

B0 § 7 — Interpretation Receipts

- Primary evidentiary hash: BLAKE2b-256.
- All interpretations must pass the Audit Gate (Boundary preservation, Authority leakage, Vocabulary compliance, Conflict scan, Drift check).

B0 § 8 — Book 0 Lock Statement

Book 0 does not create authority. Book 0 governs access to authority.

B0 § 9 — Constitutional Relationship Clause

Book 0 (Interpretive Control Plane) gates access to Book I (Operational Source Constitution).

B0 § 10 — Negative Doctrine / Forbidden Transformations

- Advisory → Authority: **FORBIDDEN**
- Engine model → Verdict path: **FORBIDDEN**
- Scientific mode → Doctrine exception: **FORBIDDEN**
- Swarm concept → Governance authority: **FORBIDDEN**
- Lane 2 content → Lane 1 state: **FORBIDDEN**

B0 § 11 — Audit Gate Rule

All interpretations must pass the Audit Gate before being accepted as CANON.

B0 § 12 — Open Issues Register

1. [TRACKED] Sensor-specific re-derivation for non-optical sensors.
2. [TRACKED] Final HRG9 seal procedures.
3. [TRACKED] MRAM-R canonization.
4. [TRACKED] WARM storage tier definition.
5. [TRACKED] HotWriter production release.
6. [TRACKED] Kubernetes-owned CRAM-A/0 governance.

B0 § 13 — Provisional Artifact Set

(B0-01 through B0-07)

B0 § 14 — Addendum A: Interpretive Separation Law

Substance (Doctrine) is separate from the Interpretation Plane.

B0 § 15 — Addendum B: Canonical Constraint Compiler

Refer to `policy.yaml` and `invariants.yaml` for locked system constraints.

B0 § 16 — Addendum C: Recursive Drift Prohibition + Boundary Inheritance Law

Constraints may only be strengthened, never weakened, through the inheritance chain.

B0 § 17 — Addendum D: Interpretation Receipts

Every authoritative decision must produce a signed receipt with a BLAKE2b-256 hash.

B0 § 18 — Addendum E: Scientific Mode Patch

The "Six-Engine" model is an explanatory model only and does not grant autonomous authority to any engine.

B0 § 19 — Integrated Precedence Ladder

1. DOC 0 (Constitution)
2. Boundary Inheritance Law (BIL-1.0)
3. CANON Documents (Books I-II)
4. CERTIFICATION Artifacts (Book IV)
5. ANNEX / EXPERIMENTAL (Book III/V)
